### Who is Chevy454?

I'm a male person, born on May 25 1983. I have a Professional Bachelor Mecanics degree. I'm specialized in automotive technology. I went to the Karel de Grote hogeschool in Antwerp, Belgium to get this degree. Currently I'm trying to upgrade my degree to an Academic Master degree in automotive engineering. For that I have to follow a special program at the Karel de Grote hogeschool.

My nick is for some people odd or they don't understand it. Chevy refers offcourse to Chevrolet and the 454 refers to the 454CUI V8 engine which I happen to like. My Hobbies

Working on motorcycles and cars

Driving my bikes

Watching movies

Having funMy favorite game

Final Fantasy VII is the best game I have ever played, I have spend many hours and have recieved a lot of joy in doing so. It took me about 40 hours to end the game with all the sidequests. It still remains a beautifull game because the storyline is so tense, it most certainly the best game of the saga

Occasionally I play racing games like Need For Speed to spend some time.
